github.com/nachopalmeri · ignaciopalmeri.dev

Second-year student in the Bachelor's in Information Technology Management (UADE). I build and test my own projects using AI as a learning tool — from automated tests (Playwright, pytest) to backend architecture. I am looking to take my first steps in QA, bringing attention to detail, critical thinking and a real drive to learn within a team.

EDUCATION

Bachelor's in Information Technology Management

Mar 2025 – Present

UADE, Buenos Aires · Regular student, fourth term (Q4) · 15 of 40 courses passed · GPA: 8.2/10

PERSONAL PROJECTS BUILT WITH AI

JobBot — job-search bot and dashboard (MVP)

2026

[Python](#) · [FastAPI](#) · [Next.js](#) · [Supabase \(PostgreSQL\)](#) · [Telegram Bot API](#) · [Groq](#)

- Telegram bot and web dashboard that aggregates job postings, filters results and sends alerts with AI-generated summaries (Groq) — I used it in my own job search.
- Built an AI agent that writes and maintains the project's E2E (Playwright) and unit (pytest) tests:** I define which cases to cover, review every result and adjust coverage.

FranquiYA — dashboard prototype for franchises

2025 – 2026

[Next.js](#) · [FastAPI](#) · [SQLAlchemy](#) · [Pydantic](#) · [SQLite](#) · [Groq](#)

- Born from a real problem I spotted working at Grido: stock control and goods receiving were handled on paper, disconnected from orders, causing errors.
- I built a prototype to digitize it — my first project with AI: frontend prototyped in Stitch AI and backend with models via OpenCode, reviewing and adjusting every part by hand.

Darter — financial terminal and personal system

2026

[TypeScript](#) · [Supabase \(PostgreSQL\)](#) · [Ports & Adapters architecture](#) · [Telegram bot](#) · [Private](#)

- Centralizes personal finance tracking, habits, academic progress and job search, with its own Telegram bot.
- Integrates external market and news APIs on a ports-and-adapters architecture, with AI assistance and my own review of each module.

SKILLS

TESTING / QA

[Playwright](#) [pytest](#) [E2E testing](#) [Attention to detail](#)

LANGUAGES AND TOOLS

[Python](#) [Git / GitHub](#) [Bash](#)

CURRENTLY LEARNING

[SQL](#) [Java](#) [Networking](#) [HTML](#)

SOFT SKILLS

[Self-taught](#) [Proactive](#) [Curious](#) [Critical thinking](#) [Organized](#) [Works under pressure](#) [Communication](#)

WORK EXPERIENCE

Customer service and operations — Grido

2023 – Present

Buenos Aires · Part-time

- Customer service and daily cash reconciliation with **0% discrepancies**, under high operational pressure.
- Stock and inventory control with my own spreadsheets, goods receiving and sales management with the internal system.
