

Ignacio Palmeri

IT MANAGEMENT STUDENT | AI-FIRST AUTOMATION BUILDER

Temperley, Buenos Aires, Argentina ignaciopalmeri1@gmail.com linkedin.com/in/nachopalmeri
github.com/nachopalmeri ignaciop.vercel.app

PROFESSIONAL PROFILE

Second-year student in the Bachelor's in Information Technology Management at UADE. Passionate about the convergence of Artificial Intelligence, finance and systems architecture. I learn continuously and respond fast: I constantly research, test and integrate cutting-edge tools into my workflows. As an **AI-First Builder**, I specialize in using advanced assistants (Claude Code, Cursor, Aider) for rapid prototyping (vibe coding), data analysis and process automation. I complement this technical focus with real experience in the operational and financial management of a retail business, connecting technology solutions with business impact.

EDUCATION

Universidad Argentina de la Empresa (UADE)

2025 - Present (in progress)

Bachelor's in Information Technology Management

- Coursework: Business Process Modeling, Data Analysis, Corporate Finance and IT Governance.
- **Expected graduation:** December 2028 (broad availability for long-term internship programs).

WORK EXPERIENCE

Operations & Customer Service Analyst | Retail franchise (Grido)

October 2024 - Present

- Mapping and control of commercial processes: daily cash flow, account reconciliation and billing audits.
- Logistics control and inventory optimization in high-demand, constant-pressure environments.
- Ongoing analysis of the sales floor to detect administrative inefficiencies and apply data-backed improvements.

PROJECTS & SOFTWARE ARCHITECTURE (AI-DRIVEN)

JobBot — Automation & Web Scraping SaaS

- Built a full-stack platform with a Next.js (App Router) dashboard and a robust FastAPI backend on PostgreSQL.
- Implemented secure authentication (JWT), payment gateways (Stripe/MercadoPago) and a Telegram bot for notifications.
- AI-guided development methodology to accelerate delivery, with continuous integration (CI/CD), security reviews (httpOnly cookies) and native deployment on Vercel.

Predictive AI & Data Analytics Engine (Sports)

- Designed and implemented a predictive statistical system consolidating 10 data sources and APIs (including Polymarket).
- Modeling with a 7x7 Poisson probability matrix and Monte Carlo simulations to project results and expected value.
- Fully automated data pipeline and weight recalibration using stateless Python scripts run on GitHub Actions, connected to a dashboard on Vercel.

Agents System — Local Orchestration & Workflow Infrastructure

- Built a global dotfiles and local scaffolding system to standardize and optimize multi-tool workflows.
- Context management, task routing and automation of AI development environments with PowerShell and Bash scripts.

TECHNICAL SKILLS

Certifications	Red Hat System Administration I (RH124) CCNA (core concepts) AI-Workflows.
AI & Automation	AI prototyping (Claude, Cursor, Aider), Model Context Protocol (MCP), LLM API integration, prompt engineering, RAG, AI agents, vibe coding.
Development & Infra	Python, JavaScript (Next.js), PostgreSQL, REST APIs, Git, GitHub Actions (CI/CD), Vercel, Linux (Ubuntu/WSL2).
Business & IT Mgmt	Business process modeling, corporate finance, stock auditing, Jira, Agile methodologies, advanced spreadsheets (Excel).
Languages	Spanish (native) English (technical intermediate, B1+; fluent reading of technical documentation and systems papers).
